

Student Groups

Each class now has an option of making student groups. On left side bar you will see “student groups.” This new feature allows a teacher to make groups (and change them or make more than one). This would allow you to filter out just the kids in that group to add grades.

For instance, you have a class where you have two reading groups and you hate to have to add grades around the students who are not in that group – this is a new feature for you...

Go to Student Groups

Click on New – give group a name. (Notice you can make it inactive if you need.)
